Stockton Trustee Dean Pappas and The Land of Anbradire

By George Plamantouras

Two Stockton University students, William Zea and Zoe S. Pappas, spent the summer of 2015 in Greece, where they spent time at the archaeological site of Anbradire. The site is a large, ancient stone structure, possibly a temple or a fortification, with a prominent archway. The structure is built with large, rectangular blocks of stone. In the foreground, there are some smaller, more intricate stone carvings or structures. The background shows a hazy, possibly mountainous landscape.

Dean George Pappas, Stockton University's Dean of the College of Arts and Sciences, and his wife, Zoe, recently returned from a trip to Greece. The trip was a major focus of their summer activities. They spent time at the archaeological site of Anbradire, which is a large, ancient stone structure, possibly a temple or a fortification, with a prominent archway. The structure is built with large, rectangular blocks of stone. In the foreground, there are some smaller, more intricate stone carvings or structures. The background shows a hazy, possibly mountainous landscape.

The Pappases have been instrumental in providing Stockton students with a variety of opportunities to learn through study, tours, museum trips, and archaeological excavations. They have worked on an archaeological excavation just outside of the site of Anbradire. The excavation was a major focus of their summer activities. Eastern Cyprus Post-Conference Byzantine Excursion in Western

July 7-10, 2015

by Professor Amy Papalexandrou

by Prof...

What happens when you cram eight Stockton students and seven professors into a small bus headed to the Troodos Mountains in Cyprus? What an educational experience, of course! Especially when the students and faculty are as enthusiastic and easy-going as the group that I headed off with me immediately following the international conference, "Lines Between: Culture and Empire in the Eastern Mediterranean," which was organized by Dean Lisa Hönlaker and Professor David Roessel of Stockton University in conjunction with colleagues at the European University.
